

J R Centrepieces PAT Testing Statement

Company: J R Centrepieces Ltd
 Prepared by: Rachel Barron
 Date: 28/02/24

To whom ever it may concern

All centrepieces and uplighting are battery powered. As PAT only applies to devices you plug into the wall, PAT testing is not applicable. We are therefore not required to carry out testing.

Extracted from government source...

What is Included? Portable Appliance Testing (PAT) applies to all electrical or electronic items that are connected to a single phase 240 volt main supply via a user removable plug, typically 13 amp square pin. The portable applies to the connection to the electrical supply not whether the item is itself portable.

Appendix 1

GUIDANCE FOR OFFICES AND OTHER LOW RISK ENVIRONMENTS
